

TotalSense Series IAQ/Occupancy Sensor

Industry's first IAQ sensor with PIR motion detection
 Ten environmental sensors: PIR, PMx, VOC, CO2, CO, O3, RH, T, ambient light, barometric pressure
 BACnet/Modbus or analog outputs with set-point relay

DESCRIPTION

The TotalSense Humidity version is designed for quick-installation and complete flexibility. With options for analog or BACnet/Modbus connectivity, four display options, various thermistors, sliders, and pushbuttons, it can be configured for any job. Motion detection (PIR) can initiate ventilation upon occupancy, providing air exchanges the instant people are present (in addition to monitored elevated CO2 levels.) This technology provides a much faster trigger for ventilation allowing for cleaner and safer indoor spaces while still saving energy. PIR and ambient light sensors can also be utilized for light harvesting for additional energy savings and code compliance. The TotalSense Series also includes a comprehensive selection of IAQ sensors. For options including CO2, TVOC, or PM, see the "indoor air quality" section.
