EMX Sync App Interface Guide

153-0066-0A 3/13/2025

Applies To: Senva EMX Series

Description: Interface Guide for how to configure the EMX products using the Senva Sync Mobile App.

OVERVIEW

The Senva Sync Mobile App uses near-field communication (NFC) to interface with the EMX. Using the app you are able to configure device settings, communications settings, pull data logs, and even create templates that can be used to configure multiple devices without even having to remove the device from its packaging.

Contact Senva Tech Support at **(503) 462-1649** for any additional questions.

SCANNING DEVICE

- 1) Open the Sync App on your mobile device and press the "Scan Device" button

- 2) Hold the NFC scanner on your mobile device close to the EMX (NFC scanner is usually close to the camera on your mobile device). Note:
- 3) Once the EMX has connected, a green checkmark will be displayed on the App and then the main device information screen will display

DEVICE SETTINGS

- 1) Note: Reference the EMX Display Navigation Manual for details on each setting.
- 2) Select "Edit Settings" from the main menu.

EMX
Model: EMX
Firmware Version: 2.3.2

- Edit Settings** 
- Write Device 
- Save Template 
- Logging 
- Sync RTC 

- 3) Metering:

Metering			
Phase Configuration	ABCN - 3 Phase		
Current Element	Current Transformer		
Current Scale Factor	100		Voltage fine tune scale 1 
Current Element Orientation	+++ (ABC)		Current fine tune scale 1 
Voltage Scale Factor	1		Real power fine tune scale 1 
Display units	IEC Units (P/Q/S)		Reactive power fine tune scale 1 

4) Communications Settings:

Communications			
Communication Protocol	Modbus		
Baud Rate	19200		BACnet Max Master Address
			127 
Modbus Parity and Stop	Even Parity 1 Stop Bit		BACnet Device Name
			EMX-011101 
Modbus Address	247		BACnet Device Description
			Energy Meter 
BACnet Device Instance	665000		BACnet Device Location
			N/A 
BACnet MSTP Address	0		BACnet Device Profile
			665-Device-EMX 

5) Alarm Settings:

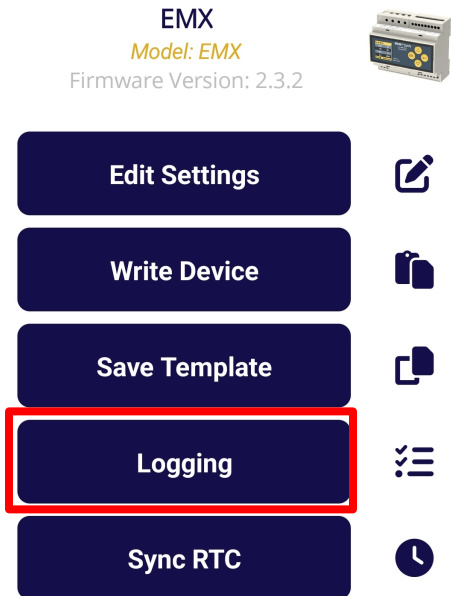

Alarms		
		Current Out of Range Threshold 10 
Voltage Out of Range Enable	Disabled 	Ground Current Out of Range Enable Disabled 
Voltage Out of Range Nominal Value	240 	Ground Current Out of Range Nominal Value 5 
Voltage Out of Range Threshold	10 	Ground Current Out of Range Threshold 10 
Current Out of Range Enable	Disabled 	Frequency Out of Range Enable Enabled 
Current Out of Range Nominal Value	5 	Frequency Out of Range Nominal Value 60 
		Frequency Out of Range Threshold 10 
Voltage Phase Loss Enable	Enabled 	
Voltage Phase Loss Threshold	10 	
Voltage Imbalance Enable	Enabled 	
Voltage Imbalance Threshold	10 	
Low Power Factor Enable	Enabled 	
Low Power Factor Threshold	0.5 	

6) Logging Settings (Refer to EMX Modbus Manual for registers):

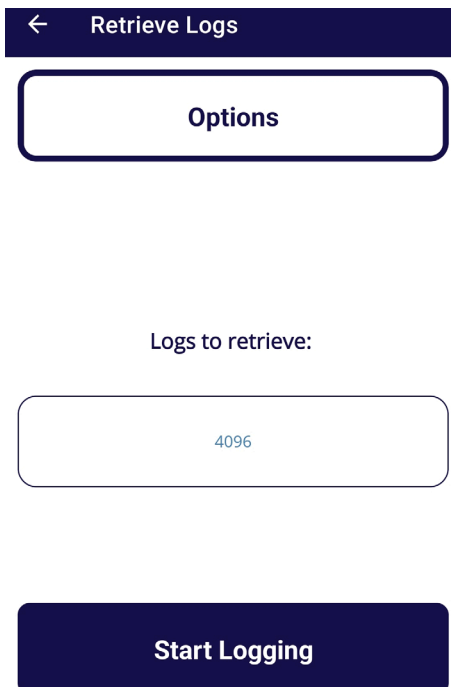

Logging		
Log Trigger	COMMs	
Log Interval	300 Seconds	
Log Mode	One Shot	
Log Source 1	11	
Log Source 2	12	
Log Source 3	13	

LOGGING RETRIEVAL

- 1) Click the "Logging" button to enter the menu for log retrieval:

- 2) Retrieve Logs:

REAL-TIME CLOCK SYNC

- 1) Click the "Sync RTC" button to sync the EMX to the current date/time of your device:

EMX
Model: EMX
Firmware Version: 2.3.2

Edit Settings 

Write Device 

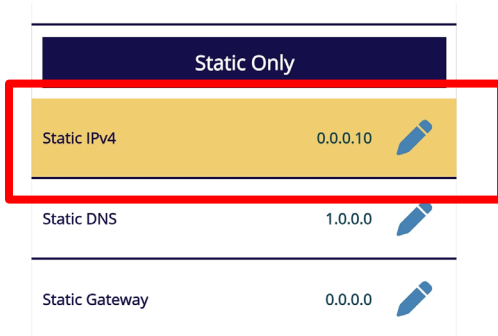

Save Template 

Logging 

Sync RTC 

WRITING UPDATES

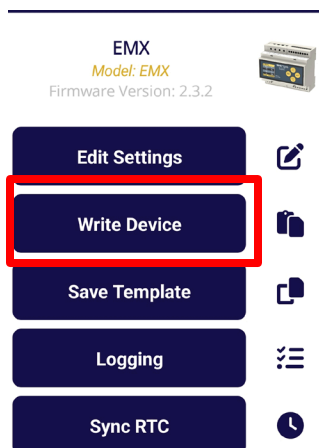

- 1) Any settings that have been modified will be highlighted in Yellow. Once all desired settings have been changed, press the "Save" button.

- 2) Click "Yes" to accept updates.

- 3) Click the "Write Device" button.

- 4) Select either "Single Device" or "Multiple Devices" depending on how many devices you are updating.

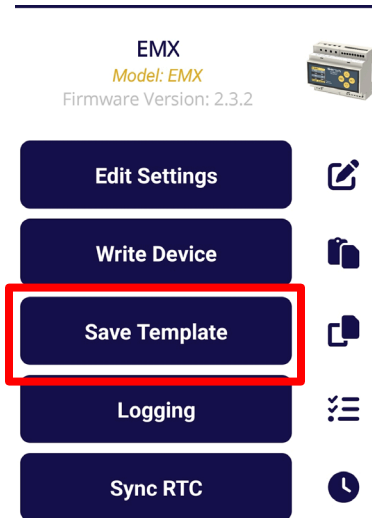

- 5) Hold the NFC scanner on your phone close to the device, a green checkmark will pop up on the screen once it is connected and settings have been updated.

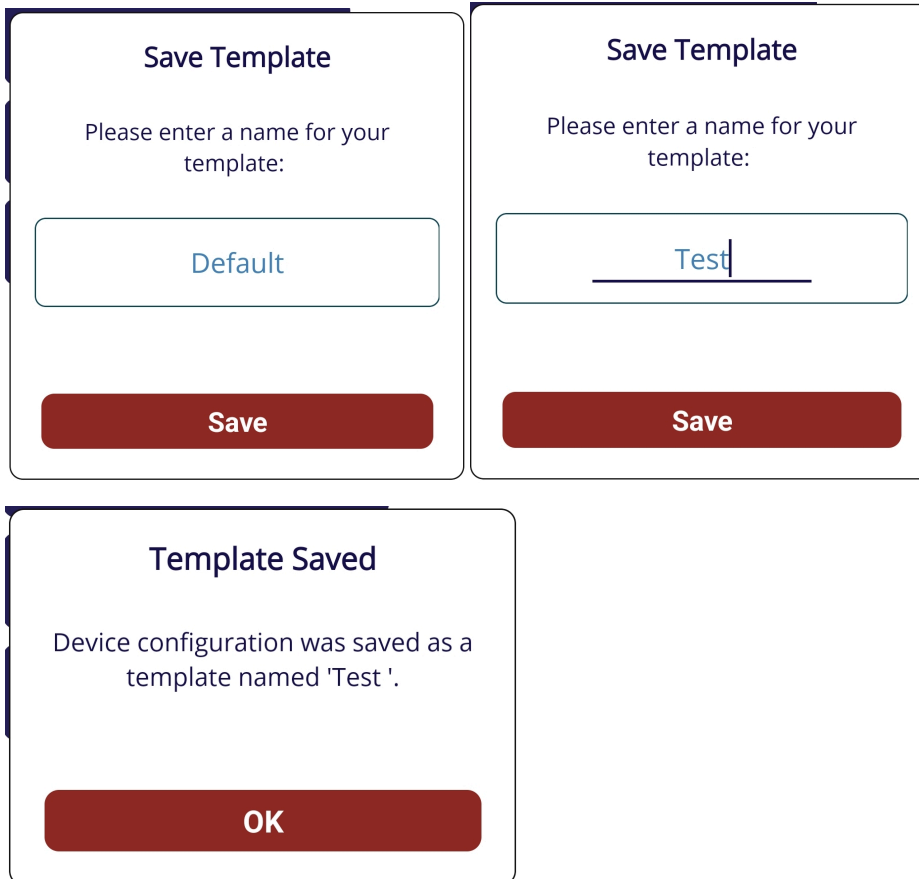

- 6) When updating multiple devices, you will be prompted to scan each device individually.

TEMPLATE CREATION

- 1) When your device is configured as desired, click the "Save Template" button to create a template that can be used to configure additional devices with the same settings.

- 2) Enter the desired name for your template (Default: "Default"). Click "Save" once done. Click "OK" to confirm that the template was saved.

- 3) All Templates can be found by clicking on the “Templates & Sessions” button on the main app screen.

- 4) The Templates menu can be used to view available templates, modify settings, write to device(s), import new template files, export template files, and delete templates.
